Critter Corner

Phidiana Hiltoni— The Killer Nudibranch

These guys are hunting other nudibranch and eating them one by one. They have been moving up our coast due to the changes in water temperature. They grow to about 3 inches in length. They are usually found in shallow waters off our coast and have moved into the Monterey area coming from southern California warmer waters.

NEW ITEM

ATOMIC SPLIT FINS ARE IN!

More propulsion less air, look at the tail of fish and you will know why they are split. They provide less stress on knees and ankles. While you may think a paddle fins goes faster because the resistance but it takes more kick with a paddle fin that a split to go the same distance. Atomic fins have rubber rails yet plastic middle sections to reduce weight and allow a smooth effortless kick. Independent testing has confirmed that split fins design significantly reduces air consumption producing an efficient kick winning the Tester's Choice Award for fins. Come in and see our selection of full foot and open heel fins.
